

Fuel Mix Disclosure

It's important you know how the electricity you use in your home is generated, and the environmental impact. A number of different fuels such as coal, gas, nuclear and renewable resources (sun, wind and water) combine to make up our fuel mix. We publish this information annually and call this our Fuel Mix Disclosure.

This table confirms the source of the total electricity supplied by SSE Energy Supply Limited through SSE, SSE Southern Electric, SSE Scottish Hydro, SSE SWALEC and SSE Atlantic during the period from 1 April 2016 to 31 March 2017.

M&S Energy is supplied under SSE and Southern Electric, Scottish Hydro and SWALEC

As an M&S Energy customer, 100% of your electricity is matched with renewable sources. The electricity consumed by M&S Energy customers is matched by electricity that has the Renewable Electricity Guarantee of Origin (REGO). The annual consumption of electricity used by M&S Energy customers is matched with the equivalent amount of electricity generated from large scale hydro sources input to the National Grid.

SSE Generation Mix (relates to electricity supplied in the period April 2016 to March 2017)

| Electricity supplied has been sourced using the following fuels | Electricity supplied by SSE % of total | Average for UK (for comparison) % of total |
|---|--|--|
| Coal | 9% | 8.5% |
| Natural Gas | 56% | 44.1% |
| Nuclear | 5% | 21.0% |
| Renewable | 27% | 24.2% |
| Other | 3% | 2.2% |
| Total | 100% | 100% |

| Environmental impact | Electricity supplied by SSE | Average for UK |
|------------------------------|-----------------------------|----------------|
| Radioactive waste g/kWh | 0.00037548 | 0.007 |
| Carbon CO ₂ g/kWh | 298 | 254 |

M&S Energy is unavailable in the Channel Islands, Isle of Man, Northern Ireland and Ireland. Terms & Conditions apply.
